NURSING
TEXAS A&M UNIVERSITY

At the **Texas A&M College of Nursing**, research is a primary foundation of our mission. We are developing innovations to enhance the education and preparation of nurses, and improving the delivery of patient care for diverse populations and translating research evidence into practice.

By integrating our research into teaching practice, scholarship is a fundamental component of the academic curriculum. As part of the Texas A&M Health Science Center, we continually strive to establish interprofessional and interdisciplinary collaborations in research to enhance the lives of people across the state, nation and around the world. We are dedicated to establishing strategic partnerships with a variety of public and private entities to support nursing research that addresses increasingly dynamic health care needs.

What follows are highlights from our faculty's scholarly activities, including current research and sponsored projects, presentations and publications.
